

# Red Wolf Engineering, v. Combat Tactical Laser,

Motion/orientation-activated firearm laser sights using sensors and control logic to distinguish aiming from high/low-ready positions, with auto-off, a 520 nm green laser, rechargeable power, rail mounting, and impact-resistant housing.

Independent preliminary research based on public information.

## VERIFIED PUBLIC RECORD

Red Wolf Engineering, LLC v. Combat Tactical Laser, LLC et al., No. 1:26-cv-03277, filed 2026-08-18 in E.D. Va..

## LIKELY RESEARCH PURCHASER

**Joshua A. Glikin** - Shulman Rogers, P.A.; named matter counsel. Glikin filed the complaint and opening disclosure for Red Wolf; his official profile describes technology, IP, electrical-device, licensing, and trade-secret litigation experience.

**jglikin@shulmanrogers.com** - publicly listed on the [official firm biography](#); not inferred.

## TECHNICAL FRAME

Motion/orientation-activated firearm laser sights using sensors and control logic to distinguish aiming from high/low-ready positions, with auto-off, a 520 nm green laser, rechargeable power, rail mounting, and impact-resistant housing.

**Secondary-source limitation:** This is a preliminary technical frame based on public sources. Filed pleadings, claim charts, discovery, source code, product versions, and admissible evidence must control. [Open public synopsis](#)

# Questions likely to require expert input

This issue map is a research plan, not a legal conclusion. The filed complaint, patent exhibits, intrinsic record, and discovery must control.

## 01 How do the accelerometer/gyroscope, thresholds, orientation estimation, timing, and embedded logic distinguish aiming from ready positions and trigger the laser?

How do the accelerometer/gyroscope, thresholds, orientation estimation, timing, and embedded logic distinguish aiming from ready positions and trigger the laser?

**Potential evidence:** Pleadings and claim charts; source code or engineering records; product and version documentation; standards and prior art; reproducible testing; and fact or technical testimony as applicable.

## 02 What are the optical, power, rail-mount, environmental, recoil, impact, and human-factors requirements of the accused device?

What are the optical, power, rail-mount, environmental, recoil, impact, and human-factors requirements of the accused device?

**Potential evidence:** Pleadings and claim charts; source code or engineering records; product and version documentation; standards and prior art; reproducible testing; and fact or technical testimony as applicable.

## 03 Which design details are proprietary, and which are routine applications of public inertial-sensing, embedded-control, and laser-module techniques?

Which design details are proprietary, and which are routine applications of public inertial-sensing, embedded-control, and laser-module techniques?

**Potential evidence:** Pleadings and claim charts; source code or engineering records; product and version documentation; standards and prior art; reproducible testing; and fact or technical testimony as applicable.

## Questions likely to require expert input

# Candidates 1-2 for further diligence

Ranked for preliminary research priority based on subject-matter fit, relevant public work, testimony, and visible diligence burden. This is not a retention recommendation.

## 01 Andrei Shkel

Chancellor's Professor of Mechanical/Aerospace and Electrical Engineering, UC Irvine

### TECHNICAL FIT

Exceptional fit for inertial sensors, orientation classification, MEMS gyroscopes, control logic, and patents.

### RELEVANT WORK

Over 250 publications, three books, and 43 U.S. patents in high-performance inertial sensing and MEMS.

### PUBLIC LITIGATION EXPERIENCE

No candidate-specific expert report, declaration, deposition, or trial testimony was located in the bounded public-source review.

### POINTS FOR FURTHER DILIGENCE

Not a firearms-product specialist; application-specific safety and ergonomics require a companion expert.

[Source 1](#)

[Draft email](#) | [andrei.shkel@uci.edu](mailto:andrei.shkel@uci.edu) | [public email source](#)

## 02 Farrokh Ayazi

Ken Byers Professor and Regents Entrepreneur, Georgia Tech ECE

### TECHNICAL FIT

Fit for inertial MEMS, resonators, accelerometers/gyroscopes, mixed-signal interfaces, and sensor integration.

### RELEVANT WORK

Fellow of IEEE and NAI with extensive integrated inertial-sensor research and commercialization.

### PUBLIC LITIGATION EXPERIENCE

No candidate-specific expert report, declaration, deposition, or trial testimony was located in the bounded public-source review.

### POINTS FOR FURTHER DILIGENCE

Device-level focus may not address firearms handling or product housing.

[Source 1](#)

[Draft email](#) | [farrokh.ayazi@ece.gatech.edu](mailto:farrokh.ayazi@ece.gatech.edu) | [public email source](#)

## Candidates 3-4 for further diligence

### 03 Anthony Rowe

Siewiorek and Walker Family Professor of ECE and CyLab, Carnegie Mellon University

#### TECHNICAL FIT

Fit for real-time embedded sensing and control, low-power implementation, and cyber-physical systems.

#### RELEVANT WORK

Researches networked real-time embedded systems coupling sensing to control actions.

#### PUBLIC LITIGATION EXPERIENCE

No candidate-specific expert report, declaration, deposition, or trial testimony was located in the bounded public-source review.

#### POINTS FOR FURTHER DILIGENCE

Bosch chief-scientist role creates conflict diligence; not laser- or firearm-specific.

[Source 1](#)

[Draft email](#) | [agr@andrew.cmu.edu](mailto:agr@andrew.cmu.edu) | [public email source](#)

### 04 Ying Zhang

Professor of Electrical and Computer Engineering, Georgia Tech

#### TECHNICAL FIT

Fit for smart sensing, data fusion, monitoring, diagnostics, MEMS, and classification algorithms.

#### RELEVANT WORK

Publishes on wireless sensing, data extraction, intelligent monitoring, and complex-system optimization.

#### PUBLIC LITIGATION EXPERIENCE

No candidate-specific expert report, declaration, deposition, or trial testimony was located in the bounded public-source review.

#### POINTS FOR FURTHER DILIGENCE

Broad sensing portfolio; no public firearm-laser work identified.

[Source 1](#)

[Draft email](#) | [yzhang@gatech.edu](mailto:yzhang@gatech.edu) | [public email source](#)

## Candidates 5-6 for further diligence

### 05 Robert Candler

Professor of Electrical and Computer Engineering, UCLA

#### TECHNICAL FIT

Fit for MEMS/nanoscale sensors, resonators, device limits, and advanced light-source components.

#### RELEVANT WORK

Leads UCLA Sensors and Technology Laboratory and is a National Academy of Inventors member.

#### PUBLIC LITIGATION EXPERIENCE

No candidate-specific expert report, declaration, deposition, or trial testimony was located in the bounded public-source review.

#### POINTS FOR FURTHER DILIGENCE

Less focused on embedded orientation algorithms and consumer product integration.

[Source 1](#)

[Draft email](#) | [rcandler@ee.ucla.edu](mailto:rcandler@ee.ucla.edu) | [public email source](#)

### 06 David A. Horsley

Professor of Mechanical and Aerospace Engineering, UC Davis

#### TECHNICAL FIT

Fit for microfabricated sensors, optical MEMS, control systems, and sensor/actuator manufacturing.

#### RELEVANT WORK

Former HP and fiber-optics R&D engineer; publishes on MEMS gyroscopes and sensing systems.

#### PUBLIC LITIGATION EXPERIENCE

No candidate-specific expert report, declaration, deposition, or trial testimony was located in the bounded public-source review.

#### POINTS FOR FURTHER DILIGENCE

Application to weapon-mounted laser sights is indirect.

[Source 1](#)

[Draft email](#) | [dahorsley@ucdavis.edu](mailto:dahorsley@ucdavis.edu) | [public email source](#)

## Candidates 7-8 for further diligence

### 07 Mahanth Gowda

Assistant Professor of Computer Science and Engineering, Penn State

#### TECHNICAL FIT

Direct fit for motion-pattern inference, inertial sensors, 3D orientation, sparse sensor data, and embedded tracking.

#### RELEVANT WORK

Researches real-world motion inference from inertial and wireless measurements in fast-moving objects.

#### PUBLIC LITIGATION EXPERIENCE

No candidate-specific expert report, declaration, deposition, or trial testimony was located in the bounded public-source review.

#### POINTS FOR FURTHER DILIGENCE

Early-career and not a laser/optics or firearms specialist.

[Source 1](#)

[Draft email](#) | [mahanth.gowda@psu.edu](mailto:mahanth.gowda@psu.edu) | [public email source](#)

### 08 Keith Morris

Ming Hsieh Distinguished Teacher Professor of Forensic and Investigative Science, West Virginia University

#### TECHNICAL FIT

Fit for firearms/ballistics context, physical evidence, testing protocols, and communicating weapon-system evidence.

#### RELEVANT WORK

WVU publicly lists ballistics and admissibility of scientific/technical evidence among his expertise.

#### PUBLIC LITIGATION EXPERIENCE

No candidate-specific expert report, declaration, deposition, or trial testimony was located in the bounded public-source review.

#### POINTS FOR FURTHER DILIGENCE

Not an inertial-sensor or embedded-control engineer; best paired with a sensor specialist.

[Source 1](#)

[Draft email](#) | [keith.morris@mail.wvu.edu](mailto:keith.morris@mail.wvu.edu) | [public email source](#)

## Candidates 9-10 for further diligence

### 09 Manon Kok

Researcher and lecturer in inertial sensing and estimation

#### TECHNICAL FIT

Direct fit for accelerometer/gyroscope fusion, position/orientation estimation, drift, filtering, and threshold logic.

#### RELEVANT WORK

Coauthor of a comprehensive tutorial on inertial-sensor orientation estimation and filtering.

#### PUBLIC LITIGATION EXPERIENCE

No candidate-specific expert report, declaration, deposition, or trial testimony was located in the bounded public-source review.

#### POINTS FOR FURTHER DILIGENCE

The email source is a 2017/2018 publication and role/contact currency must be confirmed before use.

[Source 1](#)

[Draft email](#) | [m.kok-1@tudelft.nl](mailto:m.kok-1@tudelft.nl) | [public email source](#)

### 10 Kris Pister

Professor of Electrical Engineering and Computer Sciences, UC Berkeley

#### TECHNICAL FIT

Fit for low-power MEMS, embedded wireless sensors, integrated control, and rugged miniature systems.

#### RELEVANT WORK

Pioneering work on smart dust, MEMS, low-power sensor networks, and integrated microsystems.

#### PUBLIC LITIGATION EXPERIENCE

No candidate-specific expert report, declaration, deposition, or trial testimony was located in the bounded public-source review.

#### POINTS FOR FURTHER DILIGENCE

No firearm or green-laser product work is identified; seniority may affect availability.

# Preliminary candidates; no conflicts or availability determination

- Run party, affiliate, counsel, inventor, funder, and technology conflicts.
- Confirm testimony history, exclusions, compensation, publications, patents, and deposition performance.
- Investigate licensing, grants, consulting, commercial interests, and prior technical positions.
- Confirm role fit, availability, and interest only after counsel authorizes outreach.

## ONGOING MATTER-SPECIFIC RESEARCH

Flint Witness Research works in the post-filing window, turning pleadings and public technical records into issue maps, researched candidate slates, and diligence starting points as the case develops.
